

# Project Brief

## *3900 South, Highland Drive to 2300 East*

**2007 Legislative Update**

**Provided By:**

### **Project Description: CONSTRUCTION, Safety Improvement, Local Government**

This local government safety improvement project is being managed by Salt Lake County with UDOT oversight. Its purpose is to provide safer access for pedestrians, bicyclists and vehicles traveling on 3900 South between Highland Drive and 2300 East. Project elements include reconstruction of the existing asphalt pavement section to create a consistent cross-section with curb, gutter and sidewalk.

Currently, the sidewalk along 3900 South between Highland Drive and 2300 East is not continuous and pedestrians are walking on pavement shoulder and lawns for along most of the corridor. Bicyclists also use a pavement shoulder that is not dedicated for bicycle use.

**Commission Approved Project Budget:**  
\$5,362,354

**Anticipated Schedule:**  
Construction – April 2007
